Project 1 - Create a HTML5 Website

The purpose of this exercise is to familiarize yourself with standard HTML elements and attributes by building a static website.

To get started:
1. Create an index.html file inside the "Week 2" directory you created for your Pause and Practice exercise, and then open it in Visual Studio Code.
2. Include the HTML boilerplate elements.

Then, conduct the following:
1. Write the appropriate HTML to make your website look like the following image:

CIA Realizes It's Been Using Black Highlighters All These Years

Director Demands Investigation

LANGLEY, VA—A report released Tuesday by the CIA's Office of the Inspector General revealed that the CIA has mistakenly obscured hundreds of thousands of pages of critical intelligence information with black highlighters.

According to the report, sections of the documents— "almost invariably the most crucial passages"—are marred by an indelible black ink that renders the lines impossible to read, due to a top-secret highlighting policy that began at the agency's inception in 1947.

CIA Director **Porter Goss** lamented the fact that the public will probably never know the particulars of several historic events, such as:

*   the Cold War
*   the civil-rights movement
*   the growth of the international drug trade

2. Here's the text of the page you need to add (so you don't have to type it all out manually):

   CIA Realizes It's Been Using Black Highlighters All These Years

   Director Demands Investigation

3. Be sure to turn the bulleted historic events into a list and bold Porter Goss's name.
4. Examine your website and ensure it matches the given image.

Submission:
   ● Upload and submit your .html file to the Canvas assignment by the due date. (You don't need to push this one to GitHub)

****Be sure to save your work; you will build upon this project in Week 3.
